

Secure Messaging

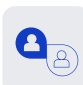

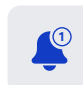

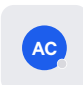

A new HIPAA compliant messaging feature built to improve the way your teams collaborate and deliver care.

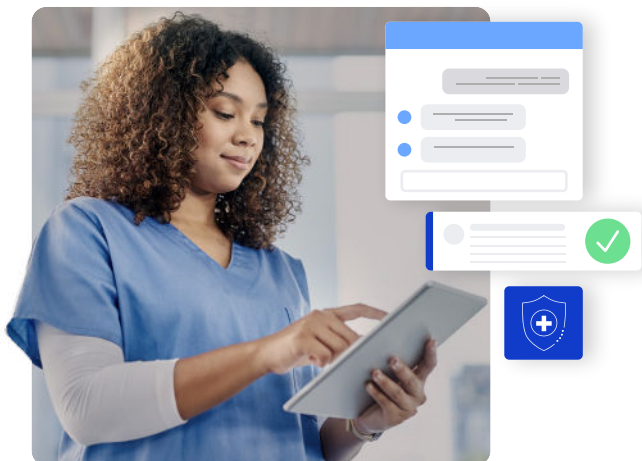

Introducing HIPAA-secure messaging to stay connected to your team

Available directly in the AlayaCare mobile and web application, the new Secure Messaging feature provides two-way instant messaging for your staff to communicate and collaborate one-on-one and in groups securely and in real time.

Features include:

 One to one messaging	 One-many messaging	 Web and mobile support
 Message delivery/read receipts	 Message & conversation search	 Web & mobile push notification
 User presence	 Language localization	+ more

Increase collaboration, transparency and connectivity amongst your staff.

All communications are secured through TLS and AES256 encryption, which allows you to have an instant, two-way dialogue amongst care staff securely at anytime, anywhere.

Increased collaboration

Keep your whole team informed of your client's care progress and continuity with instant messaging that stores communications for up to six months.

Protected, secure & compliant

Have peace of mind that important information is kept protected by providing your team with HIPAA-compliant instant messaging.

Built within a single platform

Reach caregivers instantly to notify them of last-minute schedule changes using our direct or group in-app messaging.

It's time to increase collaboration, transparency and connectivity amongst your staff today. Get in touch with AlayaCare today to learn more about Secure Messaging. .
