

Leading the evolution towards fully integrated care in Canada

The Canadian-built home and community care platform improving efficiencies and driving success for Provincial Healthcare Systems.

- AlayaCare allows you to support multi-disciplinary care coordination across the entire care continuum system
- Connects to community, provincial, and hospital systems
- Centered around patient outcomes and improving retention for clinical and non-clinical staff
- Increases visibility and enables data-driven decision-making
- Maximizes operations efficiencies and resource utilization
- Helps protect Canadian healthcare data by complying with all your provincial cybersecurity requirements and more

Delivering better outcomes across Canada

Employee retention

Provide your employees with everything they need to deliver high-quality care efficiently and optimize their schedules to allocate their time strategically.

Patient outcomes

Deliver consistent, patient-centered care that's outcome focused and empowers individuals across the entire care journey.

Support the entire care continuum

Gain visibility and streamline multi-disciplinary care operations from InterRAI assessments, intake, clinical treatments, reconciliation and discharge.

Build efficiencies and automations

Securely provide care teams with everything they need to confidently direct point-of-care activities, while providing administrators with the tools to reduce manual tasks, maximize resources, and boost operations.

Data-driven decision making

Equip decision makers with population health data insights to track trends and measure the outcomes of the home and community care sector.

Interoperability

Integrate various digital health systems and assessments into one end-to-end platform with open-APIs and system extensibility.

Our Clients & Partners

Better technology. Better outcomes.

Choose a platform with a proven track record of success across other multiple provinces

“

The AlayaCare platform was a critical enabler of Health PEI's Home Care Service Transformation to support caregivers and their clients wishing to recover and receive care in the safety of their own homes. As the demand for home care grows across Canada, we are excited about future collaborations with AlayaCare.”

Darryl Pierrynowski
Partner, Davis Pier.

Our results speak for themselves

85%

reduction in paper use and
40% reduction in errors
related to the use of paper

50-60%

reduction in administrative costs
related to scheduling, tracking
users and entering data into
multiple systems

35%

reduction in home care travel
costs via advanced algorithms
that continuously optimize
routes and schedules for
thousands of employees

AlayaCare's professional services ensure your province has a successful implementation and adoption of our platform.

Platform overview

Family portal

- Reduce call volumes with two way real-time communication between organizations and family portal users
- Empower clients and their families to request for additional services and visits directly in app

Secure messaging

- Enable one-to-one and one-to-many messaging between back office staff and caregivers
- End-to-end encryption allows you to be HIPAA compliant when communicating patient information on the go
- Leverage one platform for all your needs - from filling vacant visits with a quick group message or checking in on a client's visit with real-time communication

Shift approval & visit verification

- GPS based clock in and clock out and Telephony (Interactive voice response)
- Automated time and attendance reconciliation against the schedule
- Gain accuracy and increased compliance through location based Electronic Visit Verification

Scheduling & coordination

- Real-time visit scheduling and tracking
- Automatic schedule updates and alerts
- Improved communication and collaboration
- Optimized scheduling and caregiver matching

Billing & payroll

- Pre-configured accounting and payroll exports

Data Exploration & Reporting

- Build custom reports in your own environment
- Access to pre-configured reports build by AlayaCare
- Create and share visualizations
- Create custom dashboards

Point of care mobile & telephony

- Free your hands with voice memo and progress note updates
- Easy access to a client's care plans and patient history
- Digitally sign-off on documentation with eSignature
- Electronic Visit Verification
- Offline access

Care worker management

- Communicate and collaborate with caregivers
- Increase productivity of clinical staff
- Streamline reporting
- Increase compliance with detailed audit trails
- Predict risks of churn through employee retention dashboard

Client health record

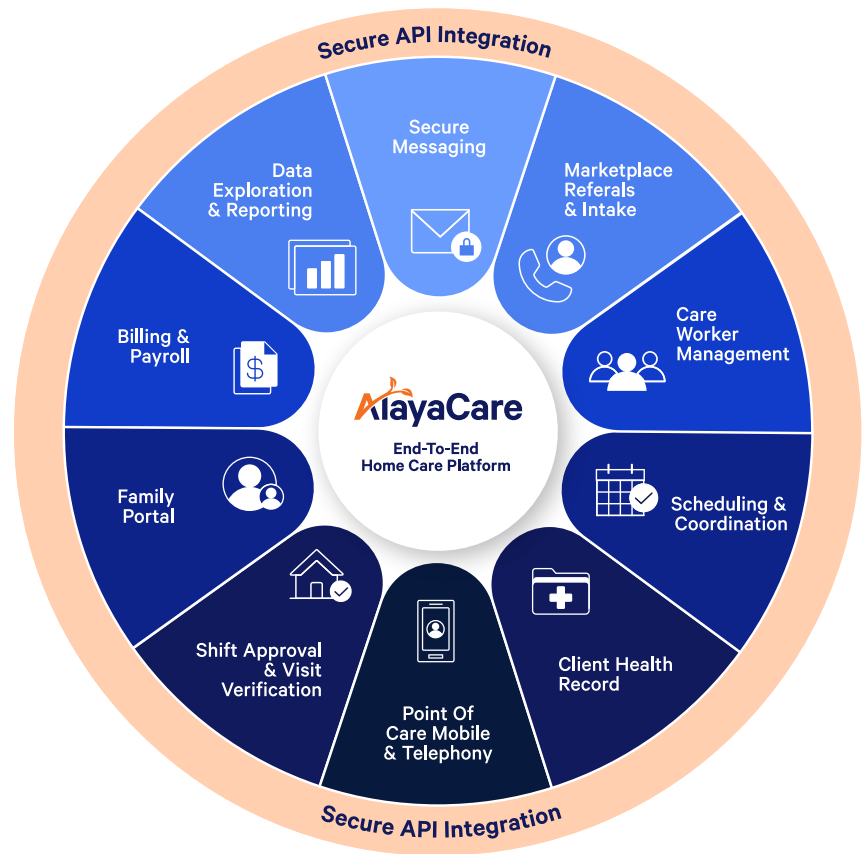

- Custom configuration
- Real-time form submissions
- Patient-centric care plans
- Multi-level security
- Configure documentation for high levels of client acuity such as wound care, infusions, medical reconciliation
- Automatically detect and flag key patient information with clinical notes detector

Referrals & intake

- Automatically map important patient data from a referral to the AlayaCare software
- Send visit and service offersto verified providers
- Accept referrals directly in your network through Marketplace integration
- Securely monitor service details when referrals have been received, scheduled, and the care has been completed

Open APIs & integrations

- Connect and integrate with any API
- Automate data and cross-platform workflows
- Access patient data at every point of the care continuum journey

Join the **300+ organizations** across Canada in using AlayaCare to enable an integrated care model with modern, secure technology.
