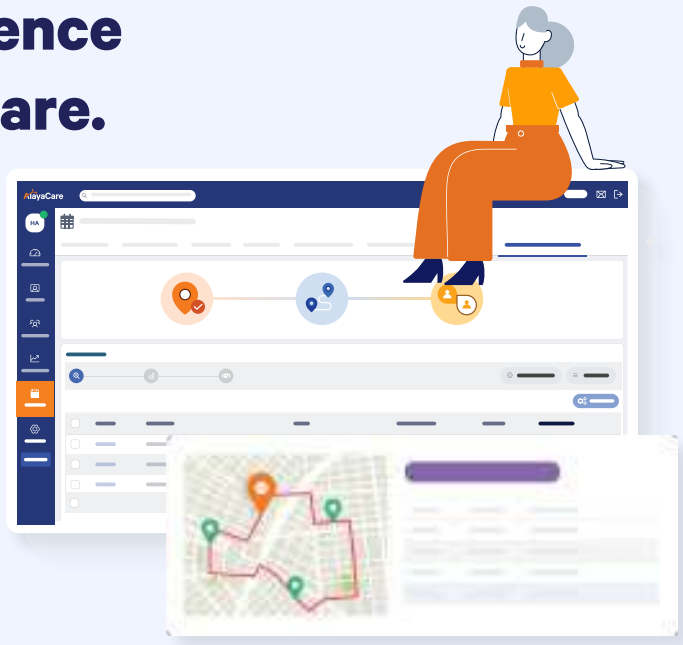
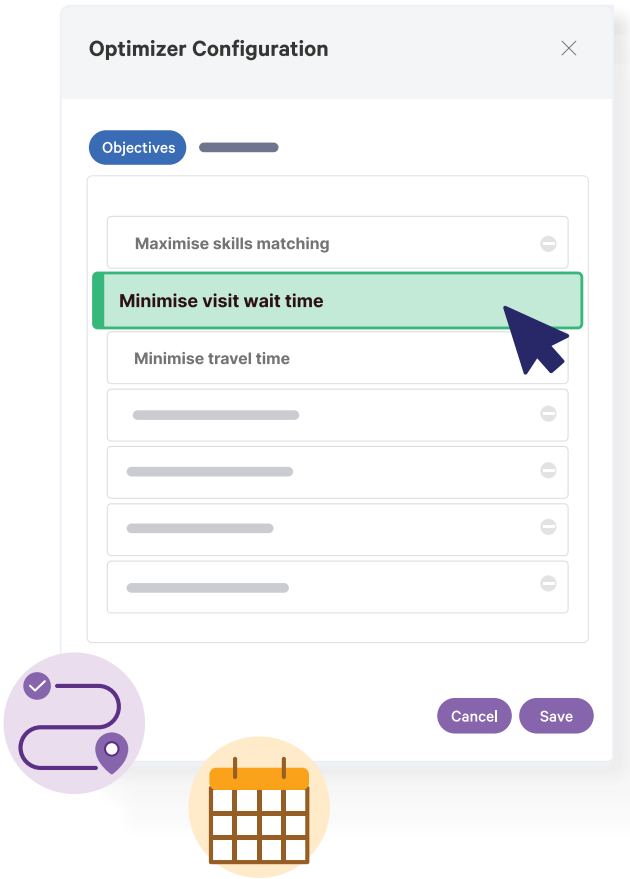
AlayaLabs: Discover the power of artificial intelligence in home and community care.

AlayaLabs is AlayaCare's research and development arm that drives innovation in the home care industry, pioneering transformative solutions that anticipate and address evolving care needs. We use data science, analytics and engineering to solve some of the industry's biggest problems with novel technologies. These technologies can be used for proactive healthcare that enhances client outcomes and boosts your organisation's efficiency.





Client Intelligence Suite: A comprehensive solution enabling clinical managers to stay informed about at-risk clients, reducing hospitalisations and improving client outcomes through a proactive approach.

Employee Retention Dashboard: Track and visualise early warning signs of churn such as late clock-ins, disengagement, low offer acceptance rates and punctuality.

Layla: The AI-powered agent from AlayaCare that is revolutionising home care workflows. Designed to integrate seamlessly within the AlayaCare platform, Layla delivers instant access to essential insights through a user-friendly and secure chat interface.

Visit Optimiser: Leverage advanced algorithms to match care providers with vacant visits based on configurable criteria you set, ensuring the best fit for each client and preserving care continuity
